What are the key product risks?

- **Credit risk**
This product is an insurance policy issued by FWD Life Insurance Company (Bermuda) Limited ("the Company"). The application of this insurance product and all benefits payable under your policy are subject to the credit risk of the Company. You will bear the default risk in the event that the Company is unable to satisfy its financial obligations under this insurance contract.
- **Exchange rate and currency risk**
The application of this insurance product with the policy currency denominated in a foreign currency is subject to that foreign currency's exchange rate and currency risk. The foreign currency may be subject to the relevant regulatory bodies' control (for example, exchange restrictions). If your home currency is different from the policy currency, please note that any exchange rate fluctuation between your home currency and the policy currency of this insurance product will have a direct impact on the amount of premium required and the value of benefit(s) to be received. For instance, if the policy currency of the insurance product depreciates substantially against your home currency, the potential loss arising from such exchange rate movement may have a negative impact on your benefits to be received from the product and your burden of the premium payment.
- **Inflation risk**
The cost of living in the future may be higher than now due to the effects of inflation. Therefore, the benefits under this policy may not be sufficient for the increasing protection needs in the future even if the Company fulfills all of its contractual obligations.

- **Early surrender risk**

If you surrender your policy in the early policy years or before the end of the policy term, or withdraw the premiums you contributed in the early policy years, the amount of the benefit you will get back may be considerably less than the total amount of the premiums you paid. The Surrender Benefit which is expressed as a percentage of actual total premium paid is payable if the Plan is surrendered before the maturity.
